

5100T

Providing Premier Processing & ATMs Since 1994

Wellington Technologies continues to expand its line of Thru-the-wall Automated Teller Machines with this introduction of the Walk-Up and Drive-Up all weather ATM manufactured by Hyosung the 5100T.

The Hyosung 5100T is a high value, through-the-wall ATM that features performance, reliability, and a wide variety of optional modules. This ATM can easily scale up after installation to suit growing demand.

A windows® open platform can handle any application software based on a WOSA/XFS platform. Optimized for decreased transaction time, multi-media advertisements, and other advanced services and functions.

Walk-up, drive-up, through-the-wall, and free-standing all are available with the Hyosung 5100T. It features a small footprint and compact architecture that offers flexible options at an affordable price.

An optional 10.4" sunlight viewable color display is designed to perform clearly inside or outside.
