

Providing Premier Processing & ATMs Since 1994

Odyssey Series 1000 and 2000 Models

Shown with optional lighted topper

Wellington Technologies is proud to announce the arrival of our newest members of the Wellington Cash Dispenser series. Now offering the flexibility to choose the dispenser capacity for your individual business needs.

The Wellington Odyssey 1000 features a Puloon LCDM-1000-note capacity dispenser designed with molded guides and paths to minimize bill jams and a medium capacity cassette perfect for daily self-loading.

The Odyssey 2000 incorporates the De La Rue 1700 2000-note capacity dispenser, known throughout the industry as the "workhorse" for high-volume retail ATMs.

Beyond the dispenser offering, the Odyssey has the addition of a Hecon high-speed thermal printer for even faster transaction completion. The self-feeding feature makes loading receipt paper effortless.

The Wellington Odyssey series machines are designed from the ground up to be easily installed and repaired. Wellington's self-loading daily cash philosophy provides you with increased profitability and the lowest operating cost in the ATM industry.

The new Odyssey is Wellington's most recent innovation. A Wellington ATM is simple to maintain, simple to use, and simply affordable.
