

Providing Premier Processing & ATMs Since 1994

Triton RL1600 Series ATMs

Entry-Level just got a lot more high-end.

Introducing the all new RL1600. Triton's feature rich, off premise ATM. With a color display, TCP/IP communication capabilities and a Windows CE operating system for faster transactions.

The RL1600 is a solution for retailers looking to boost cash sales, as well as for financial institutions interested in expanding customer touch points with off-site ATM placement.

In the RL1600, you will find an entry-level, reliable ATM whose affordable price makes it easy to place at multiple locations. Plus, the compact design means it won't take up valuable floor space.

With support for advertising and screen customizing capabilities, ATM owners can create their own marketing messages and coupons to drive traffic to your location and increase customer loyalty.

Designed and assembled in the USA, the RL1600's innovative configuration makes it as powerful as it is affordable and reliable.
