Providing Owner Repaired ATMs Since 1999

Wellington Technologies continues to expand its line of affordable owner-repaired Thru-the-wall Automated Teller Machines with this introduction of our new Walk-Up and Drive-Up all weather ATM series, the TTW-2000 & TTW-2500.

These Thru-The-Wall ATMs offer the simplicity of owner-repair and low cost-of-ownership the market place has come to expect from all Wellington freestanding cash dispensing ATMs. Now with increased security, both the TTW-2000 Walk-up and the all new TTW-2500 Drive-up ATMs offer the combination of low operating cost, affordable price and the appearance of traditional financial institution ATM units.

Every Wellington ATM product has been specifically designed to be quickly and easily repaired by its owner. Since 1999, Wellington has sold and currently supports over 550 owner repaired ATM locations nationwide. Saving our customers an average of \$1,200 per year in annual maintenance costs. That's \$6,000 over a 5-year period!

DETAILED FEATURES

- DeLaRue Dispenser known throughout the industry as the "workhorse" for retail ATMs – TTW-2000/2500 uses the DLR SDD 1700 Rear Load Dispenser.
- Bright color LCD display for easy customer viewing and for advertisement opportunities and displays – Adjusts contrast automatically to temperature and has expanded operating temperature range.
- The quiet operating 40-column thermal graphic printer (8 function keys) allows various print requirements, such as coupons and value receipts.
- Weatherized dip-style card reader for constant control and visibility of customer's ATM card, thus reducing the possibility of leaving card behind.
- Easy upgrading to accommodate Smart Cards or value stored card functions.
- Designed for not only standard dial-up communications, but also TCP/IP connectivity.
- 2040 Transaction Electronic Journaling
- Rear replenishment with Rear Display and Keyboard
- TDES and EPP Support
- Stainless Steel Fascia and Cabinet
