

Providing Owner Repaired ATMs Since 1999

Wellington Technologies continues to expand its line of affordable owner-repaired Thru-the-wall Automated Teller Machines with this introduction of our new Walk-Up and Drive-Up all weather ATM series, the TTW-2000 & TTW-2500.

These Thru-The-Wall ATMs offer the simplicity of owner-repair and low cost-of-ownership the market place has come to expect from all Wellington freestanding cash dispensing ATMs. Now with increased security, both the TTW-2000 Walk-up and the all new TTW-2500 Drive-up ATMs offer the combination of low operating cost, affordable price and the appearance of traditional financial institution ATM units.

Every Wellington ATM product has been specifically designed to be quickly and easily repaired by its owner. Since 1999, Wellington has sold and currently supports over 600 owner repaired ATM locations nationwide. Saving our customers an average of \$1,200 per year in annual maintenance costs. That's \$6,000 over a 5-year period!
